Introduction

Under Action 10 of the Action Plan ‘Financing Sustainable Growth’ [1], the European Commission has invited [2] the three European Supervisory Authorities (ESAs) to each develop a report presenting evidence and possible advice on potential undue short-termism. Short-termism can be defined as “the focus on short time horizons by both corporate managers and financial markets, prioritising near-term shareholder interests over long-term growth of the firm”[3].

The Commission’s mandate indicates that decisions taken by corporations do not fully reflect long-term aspects that would be required to put the EU economy on a sustainable path and manage the transition towards a low carbon economy. In particular, as a result of short-term market pressures, some companies may under-invest in long-term value drivers such as innovation and human capital and overlook environmental and social objectives that require a long-term orientation. Consequently, sustainability faces obstacles to develop in a context where incentives, market pressures and prevailing company culture prompt market participants to focus on near-term performance at the expense of mid- to long-term objectives.

Following an initial analysis based on desk research and preliminary quantitative evidence, ESMA has identified six areas which it considers relevant to examine in relation to the Commission’s mandate.

These areas are:

- Investment strategy and investment horizon;
- Disclosure of Environmental, Social and Governance (ESG) factors and the contribution of such disclosure to long-term investment strategies;
- The role of fair value in better investment decision-making;
- Institutional investors' engagement;
- Remuneration of fund managers and corporate executives;
- and Use of CDS by investment funds

ESMA is not claiming there is a causal relationship between the abovementioned areas and short-termism; it is rather seeking the views of stakeholders on these areas in order to better understand their interaction with short-termism. As such, responses to this survey will contribute to ESMA's analysis of potential sources of undue short-termism on corporations stemming from the financial sector in the areas of focus. Additionally, responses to the survey will back the identification of any other areas in which short-term behaviour is problematic and where the regulatory rules exasperate (or mitigate) short-term pressures.

Overall, with this survey ESMA is seeking to collect information on market practices and the views of financial market participants. By responding to the questionnaire, market participants will contribute to ESMA's advice to the Commission and as such help shape future policy decisions in relation to short-termism in the financial sector.

[3] Definition of short-termism provided in the second paragraph of section 1 of the Commission's mandate (Mason, 2015).

Structure of the questionnaire

Section I: General information about respondent

The first section of the questionnaire contains questions which will help ESMA understand respondents' profile and whether they agree for their response to the questionnaire to be published on ESMA's website.

All respondents are invited to respond to the questions in this section.

Section II: Investment strategy and investment horizon

In this section of the questionnaire, ESMA invites respondents to provide information on the key features and the focus of their investment strategy as well as on the time horizon(s) they use in their business activities. The questions aim to collect comprehensive information on the strategic approach taken by various market players, depending on their role and objectives, in order to get a broad understanding of how they prioritise short- and long-term values in their investment activities. The responses to the questions in this section are intended to provide evidence on how consistent the long-term value drivers of the investment strategy are with the investment timeframe and the global approach for investment decision-

making, and which specific considerations in investment strategies may induce short-termism.

The section is open to all respondents as it seeks information on the interaction between short-termism and general business activities. The questions relating to portfolio holdings are addressed to asset owners and asset managers.

Section III: Disclosure on ESG factors and the contribution of such disclosure to long-term investment strategies

The context for the questions in this section is the EU's 2014 adoption of the Non-Financial Reporting Directive (hereafter 'NFRD') in order to enhance the consistency and comparability of non-financial information disclosed throughout the Union. The NFRD requires large EU companies to disclose information on matters relating to the environment, social and employee aspects, respect for human rights, anti-corruption and bribery issues in an annual non-financial statement to be presented either in the management report or in a separate document.^[1]

The NFRD came into force in 2014 for reporting on the financial year starting on 1 January 2017 or during the calendar year 2017, which means that two waves of mandatory non-financial information have now been published in most jurisdictions. Section III of the questionnaire collects information on the experience of market participants with these first two disclosure waves by asking whether, how and to what extent public disclosure on ESG factors, which complements traditional financial disclosure by listed companies, can enable investors to integrate in their decision-making process considerations on a company's current and future ability to create long-term sustainable value for its shareholders and for the society at large. Furthermore, this section raises the question whether any changes relating to requirements on non-financial information are needed at European level to enable investors to take long-term investment decisions.

The questions in this section are primarily addressed to institutional and retail investors that make use of information in issuers' public reporting in their investment decisions, as well as to issuers that provide such ESG related information to investors.

[1] Additionally, the forthcoming Regulation of the European Parliament and of the Council on sustainability-related disclosures in the financial services sector (2018/0179(COD)) will require financial advisers to publish information on their policies on the integration of sustainability risks in their investment advice or insurance advice. However, as this Regulation has not yet entered into force and will not be applicable until 15 months after entry into force, it is not possible at this stage to assess its impact, and it is as such not covered in the questionnaire.

Section IV: The role of fair value in better investment decision-making

In this section of the questionnaire, ESMA seeks to collect further information related to the following statement from the report ^[1] of the High Level Expert Group (hereafter 'HLEG'): "there is considerable disagreement among interested parties on the appropriate accounting treatment for long-term investments, in particular on whether long-term assets on investors' balance sheets should be valued based on the currently prevailing (daily) market prices – also known as 'mark-to-market' valuation or 'fair value' accounting [...]. The debate is mainly around equity, equity-type and listed credit instruments on the balance sheets of long-term investors, such as non-financial corporations, insurance companies and banks."

The section contains questions on whether and how fair value may impact the capacity of financial reporting to provide relevant and reliable information on equity instruments held for long-term investment purposes. Responses in this area will help ESMA to assess how the measurement and disclosure of fair value may impact the selection of a short- or long-term horizon, as well as to assess whether the transparency benefits arising from the use of fair value for financial instruments, particularly equity instruments, outweigh the intrinsic potential volatility of fair value. Furthermore, whilst Level 1 fair value measurement is based on quoted prices in active markets and, as such, it has a high degree of reliability, ESMA is also interested in exploring the usefulness of Level 2 and Level 3 fair value measurements [2] and the extent to which investors are willing to take these fair value measurements into consideration in their long-term investment decisions.

The European Commission has issued two requests for advice to the European Financial Reporting Advisory Group (EFRAG) to assess the impact of IFRS 9 Financial Instruments on equity investments and to investigate potential alternatives to fair value accounting for equity and equity-type instruments held for the long-term. ESMA closely monitors and contributes to EFRAG's work in this area [3]. In section IV of the questionnaire ESMA investigates more specifically the reasons underlying any connection between fair value accounting and the emergence of short-term pressures in the investment practice of issuers.

The questions in this section are primarily addressed to institutional and retail investors that make use of information in issuers' financial statements in their investment decisions, as well as to issuers that prepare financial statements.

[1] https://ec.europa.eu/info/sites/info/files/180131-sustainable-finance-final-report_en.pdf

[2] Inputs to Level 2 fair value measurements are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. Inputs to Level 3 fair value measurements are unobservable inputs for the asset or liability.

[3] <http://www.efrag.org/News/Public-183/New-EFRAG-consultation-on-Equity-Instruments--Research-on-Measurement>

Section V: Institutional investors' engagement

In this section, ESMA invites institutional investors to share their experiences and views on whether and how they monitor the long-term value maximisation of their investee companies by further engaging with them and voicing their potential concerns. The questions of this section indirectly relate to the revised Shareholder Rights Directive that established specific requirements in order to encourage shareholder engagement in EU listed companies. ESMA acknowledges that the Directive has entered into application only recently. In this section ESMA seeks to collect information on how engagement activities are put in place at the time of the publication of the questionnaire based on the current regulatory framework in the relevant Member States.

For the purposes of this questionnaire, engagement is defined as any monitoring and interaction by institutional investors with investee companies, including the exercise of voting rights and other activities to influence the investee company such as activist strategies.

The questions in this section are primarily addressed to institutional investors.

Section VI: Remuneration of fund managers and corporate executives

In this section, ESMA examines whether remuneration policy and practices of fund managers can be a driver of short-termism. Stakeholder feedback in this regard will provide further evidence in relation to the statements of the HLEG report about the “frequent separation of the behaviour of some financial intermediaries from the preferences of the ultimate beneficiaries” and that “job tenure and financial rewards for analysts, asset/money managers and traders” can be heavily dependent on short-term returns.

The questions in part A of this section are addressed to UCITS management companies, AIFMs, and self-managed UCITS investment companies and AIFs as they relate to how remuneration practices impact investment behaviour of asset managers vis-à-vis the funds they manage and the investors in such funds. The questions are particularly related to the requirements arising from the UCITS Directive [1], AIFMD [2], the Guidelines on sound remuneration practices under the UCITS Directive [3] and the Guidelines on sound remuneration practices under the AIFMD [4].

The questions in part B of this section are primarily addressed to issuers with reference to the remuneration packages assigned to their executives. Evidence on this aspect is expected to provide an indication of how executives’ incentives to pursue long-term vs. short-term performance can be skewed by the way their remuneration package is designed.

In addition, each section invites all stakeholders to comment on the potential contribution to short-termism from remuneration practices for fund managers or corporate executives.

[1] Directive 2009/65/EC

[2] Directive 2011/61/EU

[3] ESMA/2016/575

[4] ESMA/2013/232

Section VII: Use of CDS by investment funds

Building on the work already conducted by ESMA [1] looking at the prevalence of sell-only or net sell Credit Default Swaps (CDS) positions held by UCITS funds, this section of the questionnaire aims to collect information on the use of CDS by all investment funds. The existing evidence shows some use of sell only or net sell holdings of CDS and ESMA would like to explore this topic further in the context of short-termism. ESMA will use the information it collects from stakeholders to assess whether the use of such instruments could be one of the potential drivers of short-termism.

Sell-only or net sell CDS positions may indicate increased short-term risk taking by funds in order to generate short-term profits, thereby diverting funds from investment in the real economy and indirectly contributing to a short-term profit taking approach. This is why ESMA would like to explore this area by gathering evidence from stakeholders, particularly regarding the reasons for sell only or net sell holdings of CDS positions, and how the tail risk of CDS is managed. ESMA recognises that there may be other categories of derivatives that may also merit attention, so one of the questions allows respondents to comment on other products as well.

The questions in this section of the questionnaire are addressed to UCITS management companies, self-managed UCITS investment companies and AIFMs.

[1] (see “Drivers of CDS usage by EU investment funds” in Trends, Risks and Vulnerabilities Report No.2 from 2018)

Section VIII: Final

The last section of the questionnaire gives respondents the chance to raise any additional considerations on the topic of undue short-term pressure on corporations from the financial sector which they have not been able to reflect elsewhere in the survey.

All respondents are invited to respond to this part of the questionnaire.

How to respond

Deadline

ESMA will consider all responses received by **29 July 2019**

Technical instructions

The questionnaire is presented in EUSurvey which is the European Commission's online survey making tool.

In order to access the questionnaire, please click on the following link: <https://ec.europa.eu/eusurvey/runner/ESMA-SUS-2019>

When you click on the link, EUSurvey will open in your default browser and you will see the questionnaire. Before starting to fill in the questionnaire, we encourage you to read through all questions.

As you go through the questionnaire and fill in your responses, additional questions will sometimes appear. Such additional questions are based on your response to a previous question and are intended to collect further information about the response you have provided. However, unless specifically mentioned, you are invited to respond to all questions.

The full set of responses is submitted by clicking the "Submit" button at the end of the questionnaire. Upon submission, the system will offer you to print or download your responses for your own reference.

For any questions regarding the questionnaire, please send an email to short.termism@esma.europa.eu

Publication of responses

All contributions received will be published following the close of the survey, unless you request otherwise. Please clearly indicate under question [6] if you do not wish your contribution to be publicly disclosed. A standard confidentiality statement in an email message will not be treated as a request for non-disclosure. A confidential response may be requested from us in accordance with ESMA's rules on access to documents. We may consult you if we receive such a request. Any decision we make not to disclose the response is reviewable by ESMA's Board of Appeal and the European Ombudsman.

Data protection

Information on data protection can be found at www.esma.europa.eu under the heading 'Data protection'.

Definitions, abbreviations, and legal references

CDS

Credit Default Swaps

Corporate executives

Top managers, such as the Chair or the CEO, and/or members of the board of directors.

Engagement

For the purpose of this questionnaire, any monitoring and interaction by institutional investors with investee companies, including the exercise of voting rights and other activities to influence the investee company such as activist strategies

ESG

Environmental, Social and Governance

Fair value

The price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (IFRS 13)

HLEG

High Level Expert Group

Holding period

For the purpose of this questionnaire, 'holding period' is defined as the elapsed time between the initial date of purchase and the date on which the investment is sold or matured if held to maturity.

Identified Staff

Categories of staff, including senior management, risk takers, control functions and any employee receiving total remuneration that falls into the remuneration bracket of senior management and risk takers, whose professional activities have a material impact on the management company's risk profile or the risk profiles of the UCITS that it manages and categories of staff of the entity(ies) to which investment management activities have been delegated by the management company, whose professional activities have a material impact on the risk profiles of the UCITS that the management corporate manages.

Institutional investors

Asset owners or asset managers acting on their behalf

Long-term investment / value

For the purpose of this questionnaire, please consider these expressions in the context set out in the Commission's mandate on undue short-termism and in the European Commission's Action Plan 'Financing Sustainable Growth'.

Non-Financial Reporting Directive / NFRD

Directive 2014/95/EU of the European Parliament and of the Council of 22 October 2014 amending Directive 2013/34/EU as regards disclosure of non-financial and diversity information by certain large undertakings and groups

Revised Shareholder Rights Directive

Directive (EU) 2017/828 of the European Parliament and of the Council of 17 May 2017 amending Directive 2007/36/EC as regards the encouragement of long-term shareholder engagement

Short-termism

The focus on short time horizons by both corporate managers and financial markets, prioritising near-term shareholder interests over long-term growth of the firm

I. General information about respondent

Please note that the questionnaire should be read in conjunction with the explanatory note, definitions and instructions. If you have not already read the explanatory note, please do so before you start filling in your responses.

- * 1. Name of the company / organisation

1400 character(s) maximum

Eumedion

- * 2. Type of respondent

Investor association

- * 3. Industry

Other

- * Please specify

1400 character(s) maximum

Eumedion represents institutional investors' interests in the field of corporate governance and related sustainability performance. It is the objective of Eumedion to maintain and further develop good corporate governance and sustainability performance on the basis of the responsibility of institutional investors established in the Netherlands. At the same time, Eumedion wants to advance the acceptance of, and compliance with, generally accepted corporate governance standards by listed companies and institutional investors in the Netherlands and Europe in particular.

- * 4. Are you representing an association?

- Yes
 No

- * 5. Country

* 6. Please indicate if wish to have your response published on the ESMA website

- I do not wish my response to be published
 I wish my response to be published

* 7. This questionnaire considers long-term investment in the framework of sustainable finance, under the assumption that long-term investment projects should be consistent with the objective of supporting the shift towards a more sustainable financial and economic system. In this context, for the purpose of filling in this questionnaire, what timeframe would you consider when defining long-term investment?

- 3-5 years
 6-10 years
 11-30 years
 +30 years
 Other

* Please explain your response

1400 character(s) maximum

Companies need time before the benefits of investments in both financial and sustainability terms materialise. However, any meaningful sustainable and economic progress should generally become evident within the next 6-10 years. There can be valid reasons why it could take longer, however it should also raise the question whether there are different approaches that lead to sustainable and economic benefits that materialise quicker. If it takes longer credibility becomes an issue, and also society can't wait forever for improvements in sustainability performance.

II. Investment strategy and investment horizon

Click [here](#) for the list of definitions, abbreviations and legal references included in the Explanatory Note

8. Which time horizon do you apply in your general business activities?

Please tick one time horizon per category

	Less than 1 year	1-4 years	5-8 years	9-12 years	More than 12 years	Not applicable
Overall	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
- Business strategy	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
- Profitability	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
- Funding	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
- Investment	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
- Trading	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
- Other	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

* Please mention your other activities and indicate the time horizon you apply to them

1400 character(s) maximum

In the light of this survey, the relevant business activity of investors is evaluating investments in companies and engaging with them. We decline to answer the other questions as the answers would vary considerably amongst the participants of Eumedion which include both pension funds and asset managers.

9. In your experience, to which extent do the following nodes in the investment value chain contribute to the tendency towards short-termism?

	1: Not at all	2: To a small extent	3: To some extent	4: To a large extent	5: To a great extent
Retail investors	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Asset owners (i.e. giving the investment mandate either on their own account or on the account of retail investors)	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Asset managers (i.e. those in charge of fulfilling the mandate of asset owners)	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Top management of listed issuers	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
Sell-side analysts	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
Other	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>

* Please explain your response

2800 character(s) maximum

Management is responsible for and has discretion over the strategy of a company. But if management is overly concerned with the current company's share price is more likely they revert to short-termism. Recent academic research commissioned by Eumedion indicates that both the type of owners and remuneration policies does affect the horizon of top management. <https://eumedion.nl/nl/public/kennisbank/publicaties/2017-09-igor-research-report-short-termism.pdf>

There generally is a distinction between sell side analysts and buy-side analysts. Sell side analysts do focus much more on quarterly disappointments/surprises and are even ranked on that basis. In Europe the sell side profession has been rapidly declining due to MiFid II. Still sell side analysts are quite vocal in earnings calls with management. Sell side analysts are publicly ranked on how well their short term predictions work out. Retail investors generally are not a very influential group of stakeholders, so it is difficult to attribute significant influence to them. Asset owners and managers are more organised and more influential. Asset managers can be confronted with outflows if their annual out-performance disappoints, unlike asset owners. However, we observe both from asset owners and managers a strong commitment towards engagements that foster long term value creation by listed entities.

*

Please mention any other nodes of the investment value chain that you believe are affected by the tendency towards short-termism and indicate the extent to which they are affected between 1 (Not at all) and 5 (To a great extent)

1400 character(s) maximum

The capital requirements of the Solvency II framework for investments in equity are so much more stringent compared to investments in corporate bonds that many insurance companies have divested most of their equity investments. It is questionable whether the relative difference in risk between the two asset classes is as big as Solvency II seems to suggest. Also in the light of the current low interest rate and low corporate bond spread environment.

10. To which extent does each of the following factors result in short-termism by your institution?

	1: Not at all	2: To a small extent	3: To some extent	4: To a large extent	5: To a great extent
Macroeconomic environment	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Prudential regulation	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Market pressures	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Profitability	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Shareholders' interest	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Business objectives	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Competitive pressure	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Client demand	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Company reporting requirements	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Executive remuneration structure	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Other	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>

* Please mention the other factor(s) that may result in short-termism by your institution and indicate their relevance between 1 (Not at all) and 5 (To a great extent)

1400 character(s) maximum

We decline to answer questions 10 and 11 as the answers would vary considerably amongst the participants of Eumedion which include both pension funds and asset managers. Eumedion is the Dutch corporate governance platform of institutional investors. Our mission is to promote long term value creation as it is a fundamental part of sustainability. Sustainability, state of art corporate governance and reporting by Dutch listed entities. We experience strong support to take a long term view from our 65 participants that have EUR 5 trillion of assets under management, whom we represent on all the aforementioned topics.

11. What is the actual holding period prevailing in your investment strategy?

Please respond on a best-effort basis and tick one holding period per category of securities

	Less than 1 year	1-4 years	5-8 years	9-12 years	More than 12 years	Not applicable
Equity	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Bonds	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Other	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

12. To which extent does each of the following factors drive the actual holding period prevailing in your investment strategy?

	1: Not at all	2: To a small extent	3: To some extent	4: To a large extent	5: To a great extent
Profitability	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
Shareholders' interest	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Competitive pressure	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
Client demand	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
Remuneration practices in the financial sector	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Economic activities	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
ESG	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
Monetary policies / macroeconomic factors	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
Non-prudential regulation (e.g. tax regulation)	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Prudential regulation	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
Company reporting requirements (any type of disclosure)	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Other	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

* Please explain your response

2800 character(s) maximum

The seven first mentioned topics all are of importance to investors. If concerns arise on any of these topics, typically investors engage with companies to gain further insights, and where necessary indicate which choices investors see as benefiting long term value creation. Prudential regulation had a significant effect on the composition of the investment portfolios of insurance companies. We refer to our response to question 9.

* Please provide (qualitative) information on the holding period considerations within your investment strategy

1400 character(s) maximum

Academic research commissioned by Eumedion on equity turnover amongst various institutional investors over long periods of time was investigated at the portfolio level. The outcomes show that on average 80% of the shares in portfolios of these institutional investors were held for more than 5 years. Only 4% of the shares in portfolios were held for less than 12 months. https://www.eumedion.nl/nl/public/kennisbank/publicaties/2012_research_report_duration_and_turnover_dutch_equities.pdf
In this context 'passive funds' should also be regarded as long term investors since their investments are only substantially adjusted through changes in benchmarks and in- and outflows.

13. On a best-effort basis, in the next 2 years, how do you expect the average holding period of the following portfolios to evolve?

Please tick one holding period per category of assets

	Increasing by less than 6 months	Increasing by 6- 12 months	Increasing by more than 12 months	No (notable) change	Decreasing by less than 6 months	Decreasing by 6-12 months	Decreasing by more than 12 months
Equities	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Fixed Income	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Other	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

* Please provide any relevant information supporting your expectations

1400 character(s) maximum

There is a strong continuing trend towards passive investment strategies which tends to increase the average holding period of investments. However, there is also an increasing demand for factor investing, which could include more volatile (ESG) factors in the composition of benchmarks. This could have a benign negative effect on the average holding periods. On the whole we would expect the average holding period to increase somewhat.

14. To which extent will the expected evolution in the average holding period, indicated under question 13, be driven by each of the following factors?

14.a Equities

	1: Not at all	2: To a small extent	3: To some extent	4: To a large extent	5: To a great extent
* Profitability	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
* Shareholders' interest	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

III. Disclosures on ESG factors and their contribution to long-term investment strategies

Click [here](#) for the list of definitions, abbreviations and legal references included in the Explanatory Note

15. Based on your experience, please indicate to which extent you agree with the following statement: “Disclosure of ESG information by listed companies enables investors to take long-term investment decisions”.

- 1: Totally disagree
- 2: Mostly disagree
- 3: Partially disagree and partially agree
- 4: Mostly agree
- 5: Totally agree

* 17. Why does disclosure of ESG information by listed companies enable long-term investment?

Please respond by selecting one or several items from the list below

- ESG disclosure provides insights into a listed company’s long-term risk profile
- ESG disclosure provides insights into a listed company’s future financial performance
- ESG disclosure complements the information provided by listed companies in their financial statements
- Other

* Please specify

1400 character(s) maximum

ESG disclosures not only complement the financial statements, they also complement management commentary. In conjunction with management commentary and the financial report, can help investors assess past, current and future risks. ESG disclosures can highlight risks and opportunities that may only materialise in the longer term, thereby supporting longer term investment decisions.

18. Even though you acknowledge that disclosure of ESG information by listed companies could enable long-term investment, you might have observed impediments as to how this link may work in practice. To which extent each of the following factors may discourage investors from using ESG disclosure to apply a long-term investment horizon?

Please respond by selecting one or several items from the list below

	1: Not at all	2: To a small extent	3: To some extent	4: To a large extent	5: To a great extent
* Lack of sufficient independent assurance on the provided ESG disclosure	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
* Lack of quantitative evidence regarding how the listed company contributes to national or international sustainability targets	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
* Lack of consistency between the disclosed ESG policies and evidence of the listed company’s actions	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
* Lack of sufficiently forward-looking disclosure on ESG risks and opportunities	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>

* Lack of comparability between different listed companies' disclosure due to the NFRD disclosure requirements not being sufficiently detailed and allowing for the use of various disclosure frameworks	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
Lack of a clear link between ESG matters and the current and future performance of the listed company	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
* Lack of an integrated presentation and analysis of financial and non-financial performance	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
* Lack of information on the disclosure framework (s) which listed companies use	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
* Lack of an explicit statement indicating that the listed company's Board of Directors takes responsibility for the relevance, accuracy and completeness of the ESG disclosure provided	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
* Lack of access to / availability of ESG disclosure in data aggregators or other source data providers	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
* Lack of sufficient knowledge by investors on how to incorporate ESG disclosure into their decision-making process	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
* Other	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>

* Please mention any other factors which you believe may discourage investors from using ESG disclosure to apply a long-term investment horizon

1400 character(s) maximum

Eumedion considers independent and authoritative standards for measurement of ESG performance as a key success factor for aligning capital allocation decisions towards those companies that best serve long term value creation. Long term value creation inherently requires companies to be aware of all of their key stakeholders. However, there is no need for auditors to await authoritative standards, as auditors could already start auditing existing non-financial KPIs along the lines of ESMA's guidelines for non-GAAP measures.

19. In your view, would requiring specific disclosures on intangible assets which are not accounted for in the financial statements enable long-term investment decisions?

- Yes
 No

* Please explain your response

1400 character(s) maximum

The existing IFRS (conceptual) framework for identifying and measuring intangible assets is grossly adequate. We see no need for an expanding the scope for identifying intangible assets beyond the existing

boundaries of IFRS. IFRS already overextended itself in identifying intangible assets like 'customer lists' when accounting for acquisitions. There may be some detailed improvements possible, but not in a way that seems to be pointed at in this question.

We generally support the view expressed in the discussion paper of the FRC 'Business Reporting of Intangibles: Realistic proposals' that disputes the importance of reconciling the market value of a company to the book value of a company in the financial statements. Instead of focussing on what intangible assets a company may have, we prefer companies to explain how they create long term value for their relevant stakeholders. I.e. more focus on the flow of value creation than any 'stores' of value. Insight in neither historical cost invested in building up intangible value beyond IFRS, nor discounted expected future intangible value seem to add any value for investors.

20. The NFRD gives companies flexibility to disclose non-financial information to the extent necessary for an understanding of the undertaking's development, performance, position and the impact of its activity in relation to non-financial matters. Do you consider that further requirements are needed to increase the level of detail in the disclosure requirements regarding non-financial information?

- Yes
- No

* Please indicate which of the following approaches you consider appropriate:

- Detailed disclosure requirements should be set out in an EU regulation (i.e. a piece of legislation which is directly applicable in all EU Member States)
- Detailed disclosure requirements should be included in the NFRD (which is a directive and as such leaves it to Member States to transpose the disclosure requirements into their national law)
- The NFRD should be amended to require use of a specific, binding disclosure framework (e.g. based on the principles included in the European Commission's guidelines on non-financial reporting or other established disclosure frameworks)
- Other

* Please explain your response

1400 character(s) maximum

<Intentionally left blank>

21. Do you consider that further steps in the area of non-financial reporting are needed at the national or the European level to enable investors to take long-term investment decisions?

- Yes
- No

* Please indicate which of the following approaches you consider appropriate:

- The NFRD should be amended to require a broader group of companies to disclose ESG information
- The NFRD should be amended to require that ESG disclosure is audited by an external, independent entity
- Enforcement powers on ESG disclosures should be strengthened and made more consistent across the Union
-

Other

* Please specify

1400 character(s) maximum

We refer to our answer to question 20.

IV. The role of fair value in better investment decision-making

Click [here](#) for the list of definitions, abbreviations and legal references included in the Explanatory Note

22. Based on your experience, please indicate to which extent you agree with the following statement: “For the purpose of undertaking an internal assessment of the performance of long-term investments held in equity instruments, fair value provides a company’s management with relevant information in order to better understand the short-term and the long-term consequences of the investments held”

- 1: Totally disagree
- 2: Mostly disagree
- 3: Partially disagree and partially agree
- 4: Mostly agree
- 5: Totally agree

* Please explain your response and provide evidence, where available

1400 character(s) maximum

Since the use of fair value for equity instruments is the only trustworthy measurement method for investors (we refer to our answer to question 23), management needs to take into account that fluctuations therein will be, and need to be, the basis for the primary financial statements. If a company wants to survive in the long run, it will need to survive in the short run as well. Fair value takes away the ability to hide losses, which actually serves society in making management more realistic in its choices as fair value measurement supports management in only taking risks that the company can really deal with. Trust in financial statements and realistic risk taking by management fosters company’s access to capital markets.

23. Based on your experience, please indicate to which extent you agree with the following statement: “For the purpose of enabling an external analyst or investor to assess the performance of long-term investments held in equity instruments by a company, fair value provides relevant information in order to better understand the short-term and the long-term consequences of the investments”

- 1: Totally disagree
- 2: Mostly disagree
- 3: Partially disagree and partially agree
- 4: Mostly agree
- 5: Totally agree

* Please explain your response and provide evidence, where available

1400 character(s) maximum

Accounting for equity instruments should reflect the economic dynamics of investing in equity instruments. Fair value is the only measurement methodology for measuring (long term) equity instruments that reflects the underlying economic dynamics and the only measurement that benefits from the trust of investors. Investors continuously need to assess the current value of their long term investments as it is their fiduciary duty to do so for their stakeholders. Investors need to assess the current value of any new equity and debt instruments issued by companies that may have long term investments. The financial crises evidently learned that historical costs accounting for debt instruments at banks made them look great, but only investable at deep discounts due to lack of trust.

24. Is the current accounting treatment for equity instruments under IFRS 9 [1] a decisive factor in discouraging a company from undertaking new long-term investments in equities?

[1] Under IFRS 9 Financial Instruments equity instruments are accounted for at fair value with the possibility to exclude fair value changes from the statement of profit or loss

- Yes
 No

* Please explain your response, including whether you already apply IFRS 9, and provide evidence where available

1400 character(s) maximum

Companies have ample freedom to explain the strength of their financial position, their 'operating' performance and the performance of their investments. If a company acts as an investor in equity instruments, it should account for them in the same way pure (long term) investors would do so. If a company finds it difficult to handle or explain fair value, it raises the question whether those investments are speculation that reach beyond realistic risk taking.

25. Is the current accounting treatment for equity instruments under IFRS 9 [1] a decisive factor in triggering divestment by a company of existing equity holdings elected for the long-term?

[1] Under IFRS 9 Financial Instruments equity instruments are accounted for at fair value with the possibility to exclude fair value changes from the statement of profit or loss

- Yes
 No

* Please explain your response, including whether you already apply IFRS 9, and provide evidence where available

1400 character(s) maximum

Continuous reassessment of portfolio risks can rightfully trigger divestments for some companies, just like it should do for investors. However, the upcoming introduction of IFRS 9 together with IFRS 17 for the insurance sector may actually foster a major increase in trust in the reporting by insurance sector. This could lead to better access to capital for the insurance sector as investors will be for the first time provided with financial positions and income statements that much better reflect underlying economics. This allows them to better differentiate between stronger and weaker companies, riskier and less risky insurance companies. Most insurance companies should be expected to benefit from the introduction of IFRS 9 and IFRS 17, even though not all insurance companies see these benefits.

26. In your view, what are the factors that may impact the relevance to users of financial statements of fair value measurements for long-term investments?

You may choose more than one factor

- Volatility in reported earnings
- Measurement errors (in Level 2 or 3 Fair Value)
- Complexity of calculations (in Level 2 or 3 Fair Value)
- Management's opportunistic behaviour (in Level 2 or 3 Fair Value)
- Insufficient involvement of independent third-party assessment (in Level 2 or 3 Fair Value)
- Limited relationship with the expected developments of fair value in the long-term
- Other

V. Institutional investors' engagement

Click [here](#) for the list of definitions, abbreviations and legal references included in the Explanatory Note

27. Is your investment strategy predominantly active or passive?

- Active
- Passive

Please respond to the remainder of this section based on (i) the investment strategy you have indicated under question 27 and (ii) the investment time horizon you have indicated under question 8

28. Please elaborate on how the actual holding period of your investments (as you have indicated under question 11) matches with your investment mandate

1400 character(s) maximum

We kindly decline to answer this question, as the nature of the mandates amongst our participants varies considerably.

29. To which extent does your firm integrate long-term value considerations for the purpose of setting its investment strategy (and subsequent portfolio allocation choices)?

- 1: Not at all
- 2: To a small extent
- 3: To some extent
- 4: To a large extent
- 5: To a great extent

30. To which extent does your firm integrate long-term value considerations for the purpose of setting its engagement policy (and subsequent engagement activities)?

- 1: Not at all
- 2: To a small extent
- 3: To some extent
- 4: To a large extent
- 5: To a great extent

31. How does your firm engage with the investee companies in order to mitigate any potential sources of undue short-termism?

Please select one or several options from the below list

- Voting at the Annual General Meeting (AGM)
- Private engagement (bilateral meetings, conference calls, etc.)
- Collective engagement initiatives (coalitions, engagement platforms, etc.)
- Litigation (or a threat to use litigation as a negotiating tool)
- Other

* Please specify

1400 character(s) maximum

Litigation does occur and the ability to litigate is an important legal right. However, most investors prefer to exert their influence in a more constructive manner. Besides, only rare and extreme cases of short-termism could possibly be countered by time-consuming litigation.

*In case you selected **more than one option** in Question 31, please explain how you select different tools used for engagement*

2800 character(s) maximum

Eumedion facilitates collective engagement between its 65 participants and individual Dutch listed entities. It is our direct experience that there tends to be strong agreement amongst our participants on what topics to engage on with individual companies. These meetings are often planned ahead of the AGM and cover both AGM agenda voting items, but also engagement on governance, strategy, sustainability, reporting and relevant company specific developments. The meetings typically are on an annual basis, but major events do occasionally lead to multiple meetings with management. The AGM season is annually evaluated in publicly available reports on the website of Eumedion.

* 32. What are the main topics your firm engages on in order to mitigate any potential sources of undue short-termism?

You may choose more than one factor

- Remuneration of directors
- Board appointments (including board diversity, independence, tenure)
- Related party transactions
- Pay-out policy (dividends, share buybacks, etc.)
- ESG / sustainability-related
- Other

* Please specify

1400 character(s) maximum

Our participants engage on all relevant topics that help them understand and contribute to long term value creation; for example strategy, fraud, corruption, audit and auditor related topics, business model, reporting, primary capital markets transactions, and industry trends.

* 33. To which extent does your firm rely on proxy advisors for the purpose of deciding how to vote in order to mitigate any potential sources of undue short-termism?

- 1: Not at all
- 2: To a small extent
- 3: To some extent

- 4: To a large extent
- 5: To a great extent

* Please indicate from how many proxy advisors you obtain advice and indicate whether you have your own engagement team and, if you do, its size

1400 character(s) maximum

We decline to answer question 33. We had to fill out something in order to finalise the questionnaire. The reason is that there is substantial variety amongst our participants in what role proxy advisors play and in the sizes of their engagement teams. However, most participants do take the input of proxy advisors into account as part of their decision making process for voting.

34. Please indicate your agreement with the following statement: "Proxy advisors take into consideration long-term value when they provide voting advice"

- 1: Totally disagree
- 2: Mostly disagree
- 3: Partially disagree and partially agree
- 4: Mostly agree
- 5: Totally agree

* Please provide quantitative or anecdotal evidence to corroborate your response

1400 character(s) maximum

The clients of proxy advisors are mostly institutional investors that have a long-term investment horizon. Consequently the voting recommendations should be aligned with the institutional investor's duty: the preservation and creation of the value of the assets on behalf of beneficiaries and clients. This is reinforced by the fact that approximately 75% of the institutional investors receive voting recommendations based on their own stewardship and voting policy and not based on the standard voting policy of the proxy advisor.

35. Please indicate your agreement with the following statement: "Engagement activities can be an efficient way of mitigating any potential sources of undue short-termism"

- 1: Totally disagree
- 2: Mostly disagree
- 3: Partially disagree and partially agree
- 4: Mostly agree
- 5: Totally agree

* Please provide quantitative or anecdotal evidence to corroborate your answer

1400 character(s) maximum

We define engagement as an active dialogue with a specific and targeted objective. Our members are institutional investors with a long-term investment horizon. Consequently, the focus of our engagement dialogues is on long-term value preservation and creation by listed companies and on behalf of the beneficiaries and clients of our members. This notion is embedded in the Dutch Stewardship Code, drafted and used by Eumedion members. As a result Eumedion and its members focus on issue that are relevant for long-term value, seek an understanding of long-term strategy, ask companies to publicly disclose material risks to long-term value and how the company's strategy and the related risks are governed by the board.

36. To which extent do you consider your engagement activities successful in mitigating any potential sources of undue short-termism?

- 1: Not at all
- 2: To a small extent
- 3: To some extent
- 4: To a large extent
- 5: To a great extent

* Please provide quantitative or anecdotal evidence to corroborate your answer.

1400 character(s) maximum

Reference can be made to our annual AGM evaluation reports (<https://www.eumedion.nl/en/knowledgenetwork/publications>), our annual focus letters (<https://www.eumedion.nl/en/knowledgenetwork/speerheadsletter>) and the 2016 research report 'Eumedion in the Dutch Corporate Governance and Sustainability Landscape' (<https://www.eumedion.nl/en/public/knowledgenetwork/publications/2016-research-report-influence-eumedion.pdf>).

37. Which are the main obstacles that institutional investors face when engaging with investee companies, and how could they be addressed in your view?

2800 character(s) maximum

In our experience the key barriers to effective engagement are 1) resourcing, knowledge and experience by institutional investors, 2) non-involvement of non-executive directors with the exception of remuneration related topics, 3) non-alignment of opinions articulated by ESG experts and portfolio managers, 4) long-term issues sometimes crowded out by short-term issues, such as specific, controversial AGM proposals. These barriers can be overcome by 1) reinforcing the close integration of stewardship with the fund managers, 2) more cooperation between institutional investors via collective engagement, 3) companies should provide regular, structural access for investors to key board members, including the chair and the chairs of key board committees also outside the busy proxy season.

38. Please indicate your agreement with the following statement: "The recent entry into application of the revised Shareholder Rights Directive is going to increase the extent to which your firm takes into account long-term value considerations for the purpose of setting your investment strategy and engagement policy"

- 1: Totally disagree
- 2: Mostly disagree
- 3: Partially disagree and partially agree
- 4: Mostly agree
- 5: Totally agree

* Please elaborate and explain which regulatory improvements could be considered, if any

2800 character(s) maximum

Although many, especially large institutional investors already have a stewardship policy, engage with companies, vote at AGMs and monitor their investee companies, the revised SRD may put pressure on institutional investors to make public how they engage with companies and what the results are. At a time of fierce competition between asset managers, the quality of stewardship may become a way for asset

managers to stand out. It is expected that, partly as a result of the revised SRD, an increasing number of asset owners – pension funds and insurance companies – will use the managers’ records on stewardship and voting to a larger extent in manager selection. This may increase the quality and effectiveness of engagement activities even further.

VI. Remuneration of fund managers

Click [here](#) for the list of definitions, abbreviations and legal references included in the Explanatory Note

Part A: Remuneration of identified staff in funds

39. What is the average investment horizon of the funds managed by your firm?

Please select one investment horizon per category of fund

	Less than 1 year	1-3 years	3-5 years	5-10 years	Over 10 years	Not applicable
Hedge funds	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
Private equity	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>

44. Do you believe there are common practices in the remuneration of fund managers that contribute to short-termism?

- Yes
- No

Part B: Remuneration of corporate executives

45. In your firm, what is the average share of the variable component of executive remuneration compared to the fixed component?

- 0-20%
- 21-30%
- 31-40%
- 41-50%
- Over 50%

46. Over what average time is the reference period calculated for variable remuneration of your firm's executives?

- Less than 1 year
- 1-4 years
- 5-8 years
- 8-12 years
- Over 12 years

47. Over what average period is the payment of the variable remuneration of your firm's executives deferred?

- less than 3 years
- 3-5 years
- 6-7 years
- 8-9 years
- 10 years or more

48. Is the awarding of variable remuneration to your firm's executives linked to any ESG-related objectives?

- Yes
- No

49. Do you believe there are common practices in the remuneration of corporate executives that contribute to short-termism?

- Yes
 No

* Please explain your response and indicate which common practices of corporate executive remuneration contributes to short-termism

2800 character(s) maximum

There are several remuneration practices that contribute to short-termism. i) if the short-term incentive is relatively large compared to the long term incentive; ii) incentives in the form of share options, as opposed to performance shares; iii) a lack of linkage between the remuneration package and the long term targets of the company; and iv) the absence of minimum shareholding guidelines, preferably set as a percentage of fixed salary.

VII. Use of CDS by investment funds

50. What percentage of your funds are exposed to CDS?

Please indicate the closest applicable percentage and use 0 to indicate 'not applicable'

	0%	10%	20%	30%	40%	50%	60%	70%	80%	90%	100%
All funds	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
UCITS funds	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
AIFs	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

51. If your funds are exposed to CDS, what are they primarily exposed to?

Please fill in the table with the applicable percentages and use 0 to indicate 'not applicable'

	Single name CDS	Index CDS	Basket CDS	Other
All funds				
UCITS funds				
AIFs				

*In case you reported a non-zero percentage to **Other** in question 51, please specify which kind of CDS you are referring to*

1400 character(s) maximum

52. What kinds of CDS exposures do your funds hold?

Please fill in the table with the applicable percentages and use 0 to indicate 'not applicable'

	Sell only	Net sell	Net buy	Buy only
All funds				
UCITS funds				
AIFs				

53. If any of your funds hold sell only or net sell CDS positions, what is their primary investment strategy?

	Equity	Fixed income	Alternative	Other
All funds	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
UCITS funds	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
AIFs	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

54. What is the average size of your fund's holding of sell only or net sell CDS exposures, expressed in assets under management (AUM)?

Please select the relevant range for each category

	Below €1 million	€1 million ≤ X < €10 million	€10 million < X < €100 million	€100 million < X < €1 billion	Over €1 billion
All funds	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
UCITS funds	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
AIFs	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

55. If you hold sell only or net sell CDS positions in any of your funds, please select in the list below one or several reasons for holding sell only or net sell CDS positions

- To gain credit exposure to underlying credit name / index / basket
- To improve returns in fund through collecting CDS premia
- Other

56. If you hold sell only or net sell CDS positions in any of your funds, do you:

- Monitor underlying default risk of the CDS reference instrument / index / basket?
- Believe your positions accentuate tail risk exposure in the funds holding them?
- Monitor potential tail risk exposure in your funds with sell only or net sell CDS positions?
- Take into account the leverage in the exposed fund?
- Other

57. Are there other classes of derivatives used by investment funds that could increase short-termism in the economy?

2800 character(s) maximum

The misuse of CDSs, like the misuse any financial instrument, indeed can contribute to short-termism. However, CDSs can also contribute to efficiently and effectively managing the risk of portfolios. Central clearing of CDSs helps mitigate the systemic risk of CDSs.

VIII. Final
